Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Student, Educator, Google Gemini AI).
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data (e.g., Question Answering, Quiz Generation, Text Summarization).
Rectangle (solid fill, no number)	Data Store	A place where data is held for later use (e.g., User Database, Local Model Directory).
Labeled arrow	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed. (e.g., User Query, AI Prompt)

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
